

The screenshot shows a web browser with multiple tabs open. The active tab is titled "krebsonsecurity.com/2013/07/experts-warn-of-new-windows-shortcut-flaw/". The page features a header with the "Krebs on Security" logo and a photo of the author, Michael Stutz. Below the header is a navigation bar with links for "BLOG ADVERTISING" and "ABOUT THE AUTHOR". The main content area displays the article title "15 Experts Warn of New Windows Shortcut Flaw" with a date of "JUL 10". The article text states: "Researchers have discovered a sophisticated new strain of malicious software that piggybacks on USB storage devices and leverages what appears to be a previously unknown security vulnerability in the way Microsoft Windows processes shortcut files." An update dated "July 16, 7:49 p.m. ET" mentions a Microsoft advisory. To the right of the text is an image of a gift box with a USB cable. On the right side of the page, there is an advertisement for "NNT" (NewNet Technologies) with the text "Compliance, Vulnerability Management, Breach Detection" and "NON-STOP FILE INTEGRITY MONITORING". Below the advertisement is a search bar and a link to "My New Book!".
